INSTRUMENTS AND EXPERIMENTAL TECHNIQUES

Numbers 1-6, 1968

(A translation of Pribory i Tekhnika Eksperimenta)

Number 1 January-February, 1968

	Engl./Russ.	
Power-Pulse Generators Using p-n-p-n Four-Layer Devices (Survey)—V. M. Onishchenko	1	5
NUCLEAR EXPERIMENTAL TECHNIQUES		
Betatron-Oscillation Resonances in Synchrotrons—Z. L. Artem'eva, O. F. Kulikov, Yu. N. Metal'nikov, E. M. Moroz, and K. N. Shotin	7	12
High-Frequency Source of Negative Hydrogen Ions from a Proton Charge-Exchange Injector —G. I. Dimov and B. N. Sukhina	12	16
Films of Samarium Isotopes for Nuclear Investigations—L. G. Lishenko, T. S. Nazarova, L. N. Reshetova, and A. A. Rozen	15	19
Evaluation of Maximum Energy of Compton-Scattered Electrons—G. M. Kish	17	20
Semiconductor Counters for Fast-Neutron Spectrometry—Yu. G. Degtyarev	20	23
Low-Background Scintillation β Spectrometer—S. M. Vakulovskii and A. N. Silant'ev	27	30
Automatic Devices for Ensuring Constant "Prehistory" of β-Spectrometer Magnets —M. I. Babenkov, L. A. Basin, V. M. Kartashov, and A. G. Troitskaya	31	33
Use of γ Spectrometers with Protective Liquid Scintillators for Analyzing Mixtures of Low-Activity Fission Products—I. E. Konstantinov and G. A. Fedorov	34	36
Stabilization System for the Gain of a Photomultiplier in a Monocrystalline Scintillation γ Spectrometer—V. S. Lukanin, G. A. Fedorov, and I. E. Konstantinov	38	40
Use of Mica, Quartz Glass, and Lavsan for Fission Detection—A. Kapustsik, V. P. Perelygin, S. P. Tret'yakova, and V. I. Sviderskii	42	43
Measurement of the Number of Fission Fragments by Means of Silica Glass —V. K. Gorshkov and L. N. L'vov	46	48
Recording of Fission Fragments by Means of Mica under Intensive Detector Irradiation with Charged Particles—O. V. Rumyantsev, Yu. A. Selitskii, and V. B. Funshtein	49	51
Recording Data from Spark Chambers with the Aid of a Vidicon—V. A. Kantserov, Yu. P. Kulyabichev, B. S. Rozov, and B. I. Tereshchenko	51	53
Determination of the (p/β) Ratio for Plastic Scintillators with Different Bases and Additions —Yu. A. Tsirlin, I. I. Zalyubovskii, T. I. Sokolovskaya, V. D. Vypirailenko, and V. D. Sarana	53	55
A Single Plastic-Scintillator Standard—Yu. A. Tsirlin, T. I. Sokolovskaya, A. R. Daich, and V. P. Shabel'nik	55	57
Construction of Polycrystalline Scintillating Layers—B. I. Shalaev	57	59
Spectrometric Scintillation Counter—V. V. Koshtoev and V. A. Karapetyan	59	60
Highly Efficient X-Ray Polarization Detector—A. A. Sanin, A. V. Zharko, A. G. Nikolaev, and A. S. Melioranskii	62	62
Functional Conversion of Ionization-Chamber Currents to a Pulse Signal—O. A. Myazdrikov	65	65
Thermoluminescent Dosimeter—K. M. Kudelin, V. B. Bulgakov, and A. A. Lebedev	69	69
Investigation of a Vacuum Chamber for X-Ray Dosimetry—K. Bekturganov and G. A. Gumanskii	71	71
Large-Area Proportional Counter for the Study of Cosmic Rays—V. V. Vasil'tsov, N. L. Grigorov, and V. Ya. Shestoperov	73	73
Pulse Lag Time in CO_2 Counters—A. S. Karasik	75	76
Electron-Optical Method of Measurement of Pulsed Ionizing-Radiation Flows —G. A. Akopdzhanov and G. A. Ivanov	77	78

ELECTRONICS AND RADIO ENGINEERING

Amplitude-Correction Circuit for Improving the Time Resolution of Analyzers —V. Ya. Averchenkov, Yu. Ya. Nefedov, and V. Ya. Gvozdev 79 80

System for Buffering the Data of a Multiscale Analyzer with a Combination-Type Memory —B. Ya. Gerasimov, V. E. Ivchenko, V. I. Smirnov, and V. L. Chernukhin 85 87

Integral and Differential Discriminators Using Tunnel Diodes—Yu. G. Budyashov and V. G. Zinov 90 92

Ring Scaler Circuits with Tunnel-Diode—Transistor Stages—K. É. Érglis and V. T. Subbotin .. 94 96

Multichannel Storage Counter—L. A. Zhuravlev 98 100

Trigger Circuits for Decatrons—V. G. Brovchenko and L. G. Kondrat'ev 101 103

Ten-Channel Timer Using Transistors—Yu. I. Nechaev 103 105

Observation and Measurement of Cross-Correlation Characteristics of Random Signals —K. G. Kir'yanov 106 108

Trigger Circuits Using the 6L1P Vacuum Tube—V. M. Rozhkov 110 111

Transistorized Measuring Amplifier—V. A. Linin' 113 114

Photoelectric Amplifier Using Transistors—Ya. G. Ponomarev 117 118

Low-Noise Preamplifier Tube—V. G. Brovchenko and Yu. D. Molchanov 119 120

Compact Generator of Single High-Voltage Pulses—N. V. Belkin and M. S. Tarasov 120 121

Transistorized Three-Channel Nanosecond-Pulse Generator—E. A. Vasil'ev, A. S. Denisov, S. P. Kruglov, and V. M. Suvorov 123 123

Generator of Nanosecond 1-MV Pulses—G. A. Vorob'ev, N. S. Rudenko, V. V. Bagin, and V. I. Tsvetkov 126 126

Transistorized High-Voltage Pulse Generator—K. A. Zheltov and V. M. Mishkin 128 128

Controlled Noise Generator—A. K. Martynichev and E. M. Belov 130 129

Wide-Range Pulse Generator For Operating Electromagnetic Shutters—V. V. Smirnov 132 130

Increasing the Sensitivity of Radiospectrometers with the Aid of the AI-256-1 Analyzer —N. V. Morkovin and Yu. D. Nechaev 134 132

Tunnel Diode in the Generator Condition as a Piezosensitive Element—N. N. Voznesenskii, B. M. Kolomytsev, and L. N. Syrkin 137 135

Open Resonator for Studying the Properties of Solids at Low Temperatures—A. N. Vystavkin, V. N. Gubankov, Yu. N. Kazantsev, and N. B. Pavlov 140 138

Follow-Up System for Aiming Optical Equipment at the Sun—L. P. Malyavkin, G. S. Cheremukhin, I. A. Zhitnik, and V. V. Krutov 143 141

Contactless dc Switching—V. Ya. Shevchenko and V. A. Skripkin 147 145

GENERAL EXPERIMENTAL TECHNIQUES

Mass Spectrometer with Ionization of Molecules by a Strong Electrical Field and Electron Impact—I. Z. Korostyshevskii and I. V. Gol'denfel'd 148 146

Quantitative Analysis on a Mass Spectrometer with Ion Accumulation in Oscillating Packets —L. N. Linnik, L. M. Blyumkin, V. I. Vinogradov, and S. V. Tsitsarin 151 148

Chromatic Aberration in a Mass Spectrometer with a Two-Stage Homogeneous Magnetic Field —V. I. Karataev 155 152

Introduction of a Sample into a Mass Spectrometer in the Form of a Molecular Beam —Gr. Alexandru 157 154

Magnetron Manometer with Cold Cathode—G. A. Nichiporovich and I. F. Khanina 159 156

Stabilizing the Evaporation Rate of Aluminum in Vacuum—I. L. Roikh and S. N. Fedosov ... 163 160

Axially Symmetric Electromagnetic High-Vacuum Tube—B. Sh. Berenshtein and V. V. Kryachko 165 161

45° X-Cut ADP Crystal as an Amplitude Modulator for Light—L. N. Magdich, A. M. Moiya, V. M. Pankratov, and I. P. Ponomareva 167 163

Electrooptic Light Modulator with a Passband of 100 MHz—L. N. Magdich, V. M. Pankratov, and I. P. Ponomareva 170 166

Radiated Power Measurement for Gallium Phosphide Diodes—L. A. Angelova, V. S. Vavilov, Z. Vyborny, and A. É. Yunovich 172 168

	Engl.	Russ.
Optical Mirror Calorimeter—N. I. Alekseev and L. M. Shestopalov	174	170
Use of Glass Corrugations and Cold Cathodes in Laser Discharge Tubes—A. Ya. Leikin, A. I. Samoilovich, and V. S. Solov'ev	176	171
Investigation of the Parameters of the Equivalent Circuit of an Electroluminescent Cell Based on a ZnS : Mn Sublimate-Phosphor—N. I. Krasnikov and S. V. Svechnikov	179	174
Meter for Measuring the Position of the Median Magnetic Surface in Equipment with a Constant Nonuniform Field—V. U. Kizilov, V. A. Skubko, and A. E. Tolstoi	182	177
Magnetometer Using a Hall Generator—G. V. Bordo and R. N. Litunovskii	187	181
Measurement of the Thickness and Profile of Liquid Films—I. A. Rogovaya, V. M. Olevskii, and N. G. Runova	189	183
Insertion of a Pulsed Magnetic Field into a High-Pressure Vessel—V. A. Venttsel'	193	186
Electrical Leads into a High-Pressure Chamber—E. S. Itskevich, V. F. Kraidenov, Z. A. Mironova, E. L. Slavyaninova, and V. A. Sukhoparov	194	187
Compact Laboratory Press—I. A. Radkevich, L. M. Vasil'ev, and Zh. B. Grigoryan	196	188
Electromagnetic Method for Measuring the Piston Velocity in Adiabatic Devices —D. S. Tsiklis and M. D. Rodina	198	190
ÉVR-1 Industrial Electronograph with Direct Registration of Scattered Electrons —A. G. Alekseev, V. A. Alekseev, L. G. Boyandina, I. A. Bul'ba, V. N. Vertsner, A. M. Gulyi, E. V. Zelenetskaya, and M. I. Tregubov	200	192
URS-3I Automatic X-Ray Spectrometer for Examination of Fine Structure of Spectra —É. E. Vainshtein, A. P. Sadovskii, V. M. Gerasimov, and V. M. Fenogenov	205	197
Rapid Determination of the Thermal Conductivity of Thermoelectric Materials —B. M. Gol'tsman and V. Sh. Sarkisyan	208	200
Recording of Thermal Fields in Semiconductor Devices by Means of Photographic Emulsions —Yu. F. Babikova, N. N. Goryunov, V. I. Kazakevich, M. N. Krementsov, and A. A. Kozhemyakin	210	202
Solenoid from Unstabilized Superconducting Cable—V. A. Al'tov, V. B. Zenkevich, V. R. Karasik, V. V. Sychev, and V. A. Tovma	212	203
Precision Automatic Cryostat-Temperature Regulator for Range 4.2-300°K—G. S. Pado, D. N. Astrov, V. I. Baibakov, V. S. Dragunov, M. P. Orlova, and V. A. Medvedev	216	207
Low-Inertia Carbon Thermometers—L. P. Mezhov-Deglin and A. I. Shal'nikov	219	209
Sensor and Temperature Regulator for Range 4.2-320°K—S. P. Logvinenko and Yu. N. Brovkin	221	212
ABSTRACTS		
System for Controlling Accumulated Beams in the VÉPP-2 Accumulator—A. A. Avdienko, V. L. Auslender, Yu. G. Matveev, S. I. Mishnev, and Yu. A. Pupkov	223	214
Determination of the Optimum Radius of the Betatron Equilibrium Orbit for Maximum Radiation Intensity—B. B. Gel'perin, M. R. Aleksandrovskii, and L. A. Fuks	225	215
Pulse Extraction of Particles into a Waveguide Separator Channel—B. N. Babkin and A. A. Glazkov	227	217
Magnetic Spectrometer for Studying the Formation of Charged π Mesons—V. G. Vovchenko, E. N. Komarov, G. B. Lichutin, V. N. Mel'nichenko, P. M. Savonenko and A. V. Shvedchikov	229	218
Use of Liquid Scintillators for Separating Neutrons from γ Rays with Respect to the Pulse Shape —L. E. Grudskaya, V. F. Poduzhailo, Yu. A. Tsirlin, and D. G. Fleishman	231	219
Time Statistics and Efficiency of Scintillation Method of Detecting Particles with a Large Mean Free Path—V. A. Murashova and V. V. Yakushin	233	221
Characteristics of Certain Liquid Scintillators under α and β Excitations —D. G. Fleishman	235	222
Pulse EPR Spectrometer for Measuring Relaxation Times—V. N. Sokolov, M. S. Fogel'son, and V. I. Muromtsev	237	224
Use of the Method of Coaxial Lines for Investigating the Properties of Rochelle Electrics in the Centimeter Region—V. V. Dem'yanov, V. M. Petrov, and S. P. Solov'ev	239	225
Measurement of Nonuniform Magnetic Fields and Their Gradients by the Nuclear-Nutation Method—V. D. Tkachenko and A. E. Tolstoi	241	227

NEW INSTRUMENTS
Apparatus for Investigating the Propagation of Submillimeter Radio Waves—Yu. S. Babkin, R. A. Valitov, S. F. Dyubko, V. M. Kuz'michev, B. I. Makarenko, A. V. Sokolov, V. A. Svich, L. I. Stroganov, and V. V. Shmidt 243 229
Temperature-Sensing Element—A. I. Krivonosov 245 230
Set of USD-4 Time Scintillation Transducers—V. A. Zelentsov 246 231
APPENDIX i

Number 2 March-April, 1968

Creation and Use of Large Centrifugal Fields (Review)—V. M. Ponizovskii 247 5

NUCLEAR EXPERIMENTAL TECHNIQUES
Effect of the Resonance Perturbation of the Magnetic Field of an Accelerator on the Stability of Particle Motion when Operating the Accelerating System with Beam Feedback—D. G. Koshkarev and V. I. Nikolaev 255 14
Measuring the Amplitude and Phase of Radial Oscillations in a Cyclotron Using Two Probes—N. N. Krasnov, A. A. Ognev, and A. A. Ponomarev 258 16
Supply and Control of an Accelerator Acting on the Principle of a Tesla Transformer—A. A. Egorov, V. S. Panasyuk, and V. M. Radchenko 261 18
Pulsed Source of High-Density Atomic Hydrogen—G. S. Voronov and N. K. Martakova 266 23
Magnetic Spectrometer with Two Strongly Focusing Magnets for Particle Momentum Analysis up to 6 GeV/c—A. S. Vovenko, M. F. Likhachev, Yu. A. Matulenko, I. A. Savin, V. S. Stavinskii and Hsü Yung-ch'ang 269 26
Detector for Measuring the Energy of Ultrarelativistic Particles—M. P. Lorikyan 273 29
Device for Recording α Particles in Reactions Caused by Fast Neutrons—G. P. Dolya, V. P. Bozhko, and A. I. Tutubalin 275 31
Telescope of Semiconductor Counters for the Separation of Charged Particles—M. F. Andreev, V. A. Zavgorodnii, V. I. Serov, U. V. Shchebiot, and A. V. Yurovskii 279 35
Accuracy of Determination of the Energy of γ Quanta in a Xenon Bubble Chamber—I. A. Ivanovskaya, T. Kanarek, L. S. Okhrimenko, B. Slowinski, Z. S. Strugalski, I. V. Chuvilo, and Z. Jablonski 283 39
System of Illuminating the PK-300 Meter Bubble Chamber—A. S. Aleksanyan, B. I. Bekker, and R. N. Pikhtelev 289 44
Liquid-Hydrogen Bubble Chamber with a Diameter of 50 cm—M. S. Ainutdinov, G. V. Beketov, S. M. Zombkovskii, S. D. Sedoikin, Ya. M. Selektor, A. M. Stepanov, B. S. Konovalov, and V. N. Shulyachenko 292 47
Spark Chambers with a 10-cm Gap in an Apparatus for the Investigation of Resonance Radiation Decays—A. T. Matyushin, V. T. Matyushin, R. Firkovskii, M. N. Khachaturyan, and M. S. Khvastunov 296 51
Digitized Wire Spark Chamber—V. S. Bekrenev, S. P. Kruglov, D. L. Nikolaev, and A. I. Shchetkovskii 299 54
Operation of a Streamer Spark Chamber—I. K. Zhankov 301 56
Measurement of the Probability of Occurrence of Spurious Pulses in Self-Quenching Counters—V. A. Dement'ev 303 58
Threshold Cerenkov Counter with a Plexiglas Radiator—V. I. Petrukhin, V. S. Pogosov, Yu. D. Prokoshkin, and Yu. N. Simonov 307 61
Spectrometric Scintillation Counter—V. V. Koshtoev and V. A. Karapetyan 312 66
Optical Nonuniformity of Inorganic Scintillators—M. N. Medvedev 315 69
Detection Efficiency of a Disperse System Composed of Scintillation Granules and a Solution for β-Active Substances—A. Ya. Gel'fman, Yu. A. Tsirlin, V. M. Ékkerman, and V. M. Solomonov 317 71

		Engl./Russ.
Determining the Concentration of Fissionable Materials in Solid Bodies—Kh. Abdullaev, A. Kapustsik, O. Otgonsuren, V. P. Perelygin, and D. Chultém	319	73
Multisectional Fission Ionization Chamber—A. Kh. Abil'daev, A. I. Khodak, E. A. Isabaev, and A. V. Yankovskii	322	76
ELECTRONICS AND RADIO ENGINEERING		
Two-Way Communication between Measuring Center and Computer—G. I. Zabiyakin, V. N. Zamrii, L. S. Nefed'eva, Yu. M. Ostanevich, and V. M. Yagafarova	324	78
Interface System for the Exchange of Experimental Information with a Computer—V. A. Vladimirov, F. Duda, and V. N. Zamrii	329	83
Nanosecond-Pulse Shaper and Coincidence Circuit—A. A. Rudenko	337	91
Circuit for Registering Pulses from a Photomultiplier—V. G. Vovchenko and V. M. Zheleznyakov	341	95
Time-to-Amplitude Converter of Photomultiplier Pulses—Yu. I. Il'in, V. A. Chirkin, and M. V. Savin	345	99
Nanosecond Time-to-Amplitude Converter—M. K. Efimchik, A. M. Zaitseva, and A. F. Chernyavskii	348	102
Application of Tunnel Diodes in Pulse Shapers—V. N. Mikhailov	352	106
Multichannel Analyzer for α-α Coincidence Selection—V. M. Kuptsov	354	108
Low-Frequency Sweep Generator—V. D. Perevertaev and A. K. Lyubavin	356	109
Blocking Oscillator with a Controllable Pulse Duration—V. V. Kurenev and B. G. Tarasov	359	113
Low-Frequency Parametric Amplifier—A. S. Ignatenko, G. E. Novikov, and Yu. G. Belashov	360	114
Current Integrator with Controlled Gate—N. G. Afanas'ev, V. M. Denyak, V. I. Startsev, and P. P. Pal'-Val'	363	117
High-Voltage Pulse Generators for Cable Feeding Spark Chambers with 1 to 15 cm Gaps—A. T. Matyushin, V. T. Matyushin, R. Firkovskii, and M. N. Khachaturyan	366	119
Improving the Rise Time of High-Voltage Pulses—Yu. P. Usov and A. G. Sterligov	370	123
Generation of High-Repetition-Rate Video Pulses—A. S. Mironos and M. D. Dubyantseva	372	125
Transistorized Amplitude Selector—V. V. Dolgikh	375	128
Method for Tuning Threshold Devices—T. I. Tomson	377	130
Pulsed Magnetron Triggered by Trains of Sync Pulses—D. G. Borisov and A. I. Gryzlov	379	132
Microwave Spectrometer for Investigating Antiferromagnetic Resonance in the Two-Millimeter Wavelength Range—V. A. Sanina, V. S. Mandel', A. G. Gurevich, and E. I. Golovenchits	381	133
Ruby Wideband Traveling-Wave Laser Paramagnetic Amplifier with an Adjustable Instantaneous Amplification Band—E. G. Solov'ev, Yu. V. Abazadze, A. V. Startsev, and E. G. Stepanova	384	136
Device for Measurement of Inversion Coefficient with Separate Resonant Cavities—M. M. Zaitov and V. I. Shlenkin	386	138
Measurement of Cavity Q with Penrecorder Tracing of Resonance Curve Derivative—I. G. Naumenko and V. I. Petinov	388	139
Equipment for Reproducing a Signal from Its Oscilloscope Photograph—P. A. Andreev, V. N. Arzumanov, and V. Yu. Petrun'kin	390	141
Instrument for Constructing the Curve of a Single Process by Means of Points—L. B. Katsnel'son and F. I. Kogan	392	143
Method of Supplying a Reflex Klystron—F. F. Mende, V. M. Dmitriev, E. V. Khristenko, and G. E. Churilov	395	146
Four-Channel High-Voltage Supply with Stabilization and Adjustment in the 5-25 kV Range—N. S. Glagoleva, A. T. Matyushin, V. T. Matyushin, R. Firkovskii, M. N. Khachaturyan, and I. V. Chuvilo	397	148
Semiconductor Stabilized Current Regulator for an Electromagnet—V. M. Naumenko and B. G. Rudenko	399	150
Transistor Current Stabilizer for Electron-Tube Heaters—E. I. Borovkov	402	153
Stabilized Supply of the Amplifiers of SF-4 and SF-5 Spectrophotometers—A. A. Tsyganii, Yu. I. Yakubchuk, P. E. Pilipenko, and A. M. Azarov	405	155

GENERAL EXPERIMENTAL TECHNIQUES

Ion Collector of Mass Spectrometer with Movable Slits—V. P. Strizhov, V. I. Ustinov, V. A. Grinenko, and B. S. Fedorov	407	156
Regulation of Titanium Evaporation by Changing the Electron Emission Current—A. S. Nazarov, É. A. Makh, and G. F. Ivanovskii	408	157
New Fore Vacuum Zeolite Production-Type Pumps and Sets for Oil-less Evacuation—E. N. Martinson, B. I. Plechev, and A. I. Mironov	411	160
High-Vacuum Metallic Valve with an Elastic Filler—S. I. Gendel', V. I. Karpov, and L. E. Levina	414	163
Bunching Factor of Photoelectrons in a Channel Electron Multiplier—M. F. Adamovich, N. F. Andryushin, B. P. Bulatov, and P. K. Oshchepkov	415	164
Pulsed Gas-Discharge Commutators Having Radioactive Stabilization of Punch-Through Voltages—S. I. Lobov, V. A. Tsukerman, A. P. Zykov, M. A. Kanunov, and N. G. Pavlovskaya	418	167
Investigation of the Delay of the Light Flash of ISSh-15 Lamps—B. Z. Gorbenko, Yu. A. Drozhbin, and A. M. Tolmachev	421	169
Simplest Narrow-Band Photometer with Multistage Photomultiplier—V. I. Dianov-Klokov	425	174
Photodiode Circuit for Measuring the Variable Component of a Luminous Flux—V. I. Avgust	427	176
Attachment of the SF-4 Spectrophotometer for Measuring the Spectra of Diffuse Scattering—A. A. Pankratov and E. I. Kotov	428	177
Generation of Ruby Laser Giant Pulse of High Power in a Narrow Spectral Interval—V. V. Morozov	430	179
Laser with a Nonreciprocal Element—F. G. Badalyan, K. V. Karmenyan, and Yu. S. Chilingaryan.	433	181
KDP-Crystal Electro-optical Device for Deflecting a Laser Beam—N. N. Fomichev	436	184
Internal Mirror Mount for Gas Lasers—V. P. Zaitsev	439	186
Laboratory Clamp-Type Diode Holders for Injection Lasers and Electroluminescent Diodes—B. I. Belov, P. G. Eliseev, Yu. P. Zakharov, I. Ismailov, and V. P. Strakhov	440	187
Apparatus for Absolute Measurements of Fairly Strong Nonuniform Magnetic Fields—I. M. Beskrovnyi and Yu. V. Gorelkinskii	442	189
Ballistic Scales for Measuring Magnetic Susceptibility in Short-Period Pulse Fields—N. B. Brandt, A. N. Rodionov, and E. A. Svistova	446	192
Optimum Coil for the Excitation of Magnetic Fields—B. V. Kabelev	450	196
Electrolytic Simulation of the Distribution of a Static Magnetic Field near Superconducting Surfaces—L. I. Slabkii, A. S. Egorov, and P. E. Kosarin	453	198
Recording the Interference of Polycrystalline Specimens in Short-Wave X-Ray Radiation with Microsecond Exposures—L. A. Egorov, A. A. Lukashev, É. V. Nitochkina, and Yu. K. Orekin	455	200
X-Ray Camera for Obtaining Large- and Small-Angle X-Ray Diffraction Photographs—V. I. Gerasimov and D. Ya. Tsvankin	459	204
Adaptation of the Zeiss EF4 Electron-Diffraction Camera for Studying the Structure of Molecules of Volatile Compounds—I. Hargittai, J. Hernadi, and J. Tremmel	461	206
Instrument for Studying the Spectrum and Kinetics of Semiconductor Recombination Radiation Due to Electron Excitation—I. I. Geitsi, A. A. Nesterov, and N. N. Gerasimenko	464	209
Three-Ray Electron Voltmeter for Plotting Electrical Characteristics of Semiconductor and Dielectric Thin Films—P. F. Perminov, L. I. Petrova, and E. P. Semenov	467	212
Ohmic Contacts to Gallium Arsenide—V. P. Duraev, G. A. Kubetskii, M. K. Pugach, and V. I. Shveikin	469	214
Producing Diodes on a Silicon Carbide Substrate—O. T. Sergeev	472	217
Method of Measuring Noises in High-Impedance Photoresistances Cooled to Low Temperatures—K. M. Kulikov and N. P. Likhtman	475	219
Tunnel Diode—Pressure Transducer—V. V. Klimov and V. M. Cheremikhin	478	221
Recording of the Ratio of Two Electric Signals by Means of the ÉPP-09 Self-Recorder—O. M. Sorokin	480	223
Instrument for Electroerosion Cutting of Single Crystals of Bismuth—I. M. Pilat, V. B. Orletskii, V. G. Okhrem, and S. V. Chaika	482	225

	Engl.	Russ.
Device for Remote Measurement of Temperatures—I. D. Konozenko and Zh. A. Zaika	484	226
Application of Mirror Coatings of In, Zn, and Cd on Dielectrics—K. V. Bol'shova, I. S. Levchenko, and A. A. Shubin	486	228
Production of Thin Films without Macrodefects by Vacuum Evaporation—D. V. Belyshkin, Yu. P. Kuznetsov, and A. F. Perveev	487	229
Hermetic Joints of Quartz with Metals and Glass for Service in Superfluid Helium—V. I. Bek, I. M. Zamanskii, T. P. Ptukha, and L. I. Shanskii	489	231
Capacitive Liquid Helium Level Sensor—V. P. Peshkov, A. N. Vetchinkin, and B. V. Élkonin	491	233
ABSTRACTS		
Equipment for the Pulsed Supply of a High-Current Electron Accelerator—D. V. Iremashvili, N. I. Leont'ev, Ya. R. Abas-ogly, A. S. Voznyuk, V. I. Vishnevskii, V. E. Zelenin, M. I. Matrosov, and A. S. Nasibov	493	235
Some Requirements on a Supply Source for a Small Betatron—S. G. Chernysheva and L. M. Anan'ev	495	236
Frequency Converter for Supplying a Small Portable Betatron—S. G. Chernysheva	496	237
"Aris" Complex for Recording and Automating the Analysis of Human γ-Radiation Spectra—E. D. Vysot-skii and B. I. Shitkov	497	238
Investigation of the Efficiency of FÉU-36 and FÉU-30 Photomultipliers under Heavy-Duty Conditions and the Choice of Photomultiplier Supply Stabilizing Circuits—M. K. Vlasov, V. P. Kanavets, N. N. Luzhetskii, B. V. Morozov, N. A. Nikiforov, A. S. Starostin, Yu. V. Terekhov, and V. I. Ushakov	499	239
Investigation of the Regulating Characteristics of Photomultipliers—Yu. V. Andreev, V. A. Volokhatyuk, R. R. Krasovskii, V. S. Larionov, and V. V. Morozov	500	239
Operation of a Photomultiplier for Modulation of Voltage Across Its Dynode—Yu. M. Rozanov, M. Yangibaev, and G. M. Barenboim	501	240
Strong Pulsed Magnetic Field Equipment—L. M. Barkov, V. P. Martem'yanov, V. V. Ogurtsov, V. G. Tarasenkov, and S. Kh. Khakimov	503	241
Graphoanalytic Method of Calculating Mechanical Stresses in a Solenoid—O. V. Biryukov, A. V. Georgievskii, and V. E. Ziser	505	242
Spectrometer for Observing Nuclear Magnetic Resonance of Ferromagnetics in the 200-1000 MHz Range—G. I. Kataev and A. K. Kupriyanov	506	243
Ultrahigh-Frequency Range Finder—P. M. Geruni, R. M. Tigranyan, and V. G. Prpryan	507	243
NEW INSTRUMENTS		
Gas Lasers LG-55 and LG-56—L. V. Soboleva and B. P. Miretskii	509	245
Gas Laser LG-75—B. P. Miretskii and L. V. Soboleva	509	245
Gas Laser LG-106—Yu. N. Shevchenko	510	246
Gas Laser LG-126—A. A. Fedotov	511	247

Number 3 May-June, 1968

Methods of Intensity Measurement in Electron Diffraction (Review)—N. V. Alekseev, and N. P. Levkin	513	5
NUCLEAR EXPERIMENTAL TECHNIQUES		
Measurement of Space Charge Density in a Synchrotron with Shift of the Betatron Frequencies towards Resonance—A. G. Stadnikov	526	22
Apparatus for Dosing the Intensity of the Secondary Particle Beam in the Channel of the Proton Synchrotron of the OIYaI—V. F. Sikolenko	530	25
Arrangement for Studying the Interaction of Electron and Photon Beams of Energies up to 2 GeV with Nuclei and Nucleons—N. G. Afanas'ev, V. A. Gol'dshtein, S. V. Dementii, O. V. Evlanov, L. D. Yaroshevskii, I. M. Arkatov, E. V. Stepula, V. M. Denyak, M. P. Korba, and V. G. Vlasenko	535	30
System for Measuring the Electron Beam Energy Spectrum at a Linear Accelerator—V. L. Karas', L. A. Makhnenko, and V. A. Skubko	540	34
Powerful Cooling Resistor for Shunting Accelerator Cavities—M. M. Karliner, G. N. Ostreiko, V. S. Panasyuk, I. K. Sedlyarov, and I. A. Shekhtman	544	38

Parameters of Experimental Magnetic Quadrupole Lenses – L. N. Vaulin, N. I. Doinikov, N. A. Monoszon, A. V. Nikiforovskii, A. V. Popov, G. N. Samsonov, and N. S. Strel'tsov	547	40
Stabilization System of a Nanosecond Time-of-Flight Spectrometer – V. G. Lapshin, M. N. Omel'yanenko, V. I. Rykalin, A. N. Sinaev, V. P. Khromov, and Z. Tsisek	551	44
Pulse Discrimination in a Proportional Counter by Reference to Growth Time – A. A. Pomanskii and S. A. Severnyi	557	51
Resolving Power of Semiconducting γ Detectors – Yu. D. Bespyatov and G. I. Kol'tsov	560	54
Diffusive Scintillators in Full Optical Contact – Yu. A. Tsirlin, T. I. Sokolovskaya, and S. B. Polyakova	565	58
ELECTRONICS AND RADIO ENGINEERING		
Circuit for Separating Pulses from Fission Fragments and α Particles in ZnS(Ag) – S. N. Kraitor	570	63
Amplitude Expander for a Spectrometer with a Semiconducting Detector – M. K. Efimchik, M. Z. Protasevich, and A. F. Chernyavskii	573	66
Million-Channel System for Measurement of Statistical Distributions – R. G. Ofengenden, F. N. Berezin, P. V. Lapshuk, and A. M. Shchur	576	68
Register with Direct Access for Wire Spark Chambers – A. I. Babaev, A. F. Belov, A. I. Ermidov, and S. S. Kurochkin	583	75
Intermediate Information Storage on Magnetic Tape Operating in a Start-Stop Regime – D. A. Asfendiarov, V. V. Dobyrn, A. I. Platunin, and M. V. Stabnikov	586	77
Biquinary Differential Counting Circuit – B. Shebesht'en and A. M. Markov	589	80
Determination of the Probability Characteristics for the Time to First Attainment of Set Limits for a Random Process – V. A. Elagin and A. V. Blokhin	593	84
Pushbutton Controlled Digital Timer – E. I. Artamonov	597	87
Two-Channel Telemetering System Records Nonrecurrent Signals – I. A. Arkhangel'skii, A. N. Volgin, A. Ya. Sapezhko, E. N. Saratovskii, V. A. Fedosov, and V. V. Filatov	601	91
Visual Indication of the State of Ferrite-Transistor Stores – V. A. Bolyshev and I. N. Kapustin	605	95
Logarithmic Signal Conversion with Transistors – Yu. V. Mineev and L. S. Aleksandrov	606	96
Broad-Band Power Amplifier – L. N. Kazanskii	610	100
Millivolt Discriminator – N. I. Karabanov and A. I. Loksh	612	102
High-Voltage Transistor Paraphase Amplifier – S. R. Ivanov and N. V. Novikova	614	103
Linear Amplifier for Spectrometers with Semiconductor Detectors – É. I. Podol'nyi	616	105
High-Voltage Pulse Generator – G. A. Kardashev and A. S. Pershin	618	107
Oscillography of the Envelope of Low-Power Nanosecond Microwave Radio Pulses – V. P. Vard'ya, A. N. Kozyr'kov, and V. S. Romanov	620	108
Ferrite Line for Producing Sharp Changes in Electromagnetic Power – G. L. Gol'denberg, I. G. Kataev, and I. I. Rozhkov	625	114
Controlled Delay Line for Pulse Signals – V. A. Alekseev, E. D. Gatelyuk, P. S. Zhivora, and V. D. Krotikov	627	117
Measuring the Capacity of Semiconducting Diodes by the Zero Beats Method – Yu. S. Provornov	629	118
Interference Attenuator of a Quasioptical Type – A. N. Akhiezer and V. I. Il'yashenko	631	120
Electret Signal Transducer – A. N. Gubkin and E. F. Tsukarev	635	124
Automatic Recording of the Volt-Ampere Characteristics of a Field-Emission Cathode – A. V. Lonskii, G. N. Fursei, and Yu. N. Kiselev	638	128
Method of Studying ESR in Strong Electric Fields – A. A. Bugai, P. T. Levkovskii, and V. M. Maksimenko	641	131
Automatic Compensation of Power Line Magnetic Noise in Magnetic Resonance Experiments – L. N. Novikov	643	134
Synchronous Detector for NMR and ESR Spectrometers – D. P. Volnyagin and S. B. Grigor'ev	645	135

GENERAL EXPERIMENTAL TECHNIQUES

Inspection Leaks of Large Leakage — N. M. Nechaeva, A. É. Rafal'son, and M. Ya. Tsymberov 646 137

Fast-Acting Dynamic Quadrupole Mass-Spectrometer — G. I. Slobodenyuk, A. I. Titov, V. S. Voronin, and V. I. Ivashkin 650 141

Mass-Spectrometer Method of Determining the Ratios of the Effective Ionization Cross Sections from the Composition of the Vapor in an Ionization Chamber — Yu. M. Ivanov and A. V. Vanyukov 655 145

Thermionic Source Emitter for the Mass-Spectral Isotopic Analysis of Cadmium — L. Ya. Memelov and G. M. Kukavadze 658 148

SSNA-0.5 Nitrogen-Cooled Sorption Ultrahigh-Vacuum Pump — A. V. Aref'ev, V. Ya. Lisitsyn, and S. P. Maksimov 660 149

Electron-Bombardment Ion Source with High Luminosity — N. K. Vasil'eva, L. N. Gall', E. M. Kleshkov, E. B. Petrova, M. S. Stepanova, and G. V. Fridlyanskii 665 154

Compact Source of Negative Oxygen Ions — T. I. Danilina, E. V. Ivanova, Yu. E. Kreindel', and L. A. Levshuk 669 158

Electron Multipliers with Increased Stability of the Output Signal — A. M. Tyutikov 673 162

Absolute Radiation Receiver in a Wide Spectral Range — L. S. Kremenchugskii and A. F. Mal'nev 676 165

Rotating Analyzer of Elliptically Polarized Light — A. I. Popov and E. D. Protsenko 680 168

Use of a Photographic Exposure Meter for Measurements of Laser Power — V. V. Lebedeva and A. I. Odintsov 682 170

Pulse Excitation of a Magnetic Field — B. V. Kabelev 684 172

Increase of the Magnetic-Field Homogeneity over the Length of a Pulsed Magnet — I. I. Ushakov 687 175

Dilatometer for High Hydrostatic Pressures — É. I. Éstrin 689 176

Dilatometer for Investigation of Solids at High Hydrostatic Pressures — A. R. Kutsar 691 178

Sensitive Automatic Balance for Operation in an Ultrahigh Vacuum — O. K. Kurbatov and Yu. I. Shcherbakov 693 180

Recording of the Velocity of High-Intensity Shock Waves with Piezoelectric Transducers — N. N. Lebedev, I. Sh. Model', and F. O. Kuznetsov 696 183

Analysis of X-Ray Spectra of Elements with Close Atomic Numbers on the Basis of Emission Peaks — R. I. Plotnikov, G. V. Zakasovskii, D. A. Goganov, G. A. Pshenichnyi, and A. P. Ochkur 699 185

Electron-Diffraction Camera with Kinematic Recording from a Moving Specimen — B. Ya. Pines and I. P. Grebennik 702 187

Double-Layer Bi + Sb Films as Test Objects for Electron Microscopes — V. M. Kosevich, L. S. Palatnik, and A. I. Fedorenko 707 192

Deformation Attachment to the URS-50-IM Diffractometer — T. A. Mingazin 710 195

Instrument for Measuring the Magnetic Permeability of Ferrites — T. A. Sanina and N. N. Dmitrieva 712 197

Construction of Ohmic Au and Ag Contacts to GaAs by Thermal Compression in Hydrogen — A. V. Kovda and P. S. Agalarzade 714 198

Characteriograph for Recording of the Volt-Capacitance Characteristics of p — n Junctions — A. R. Shelyag, P. A. Kotsyumakha, and V. G. Boiko 716 200

Method of Controlling the Vapor Feed into an Ion Source — B. N. Makov and E. A. Dmitriev . 718 202

Method of Discrete Evaporation in Vacuo — V. E. Danil'chenko and A. D. Goncharov 721 205

Production of Thin Films of Silicon Monoxide Without Through Holes — V. F. Kuznetsov, V. V. Nikitin, T. A. Rusanova, N. F. Fedorov, and B. N. Formozov 723 207

Electrically-Conducting Coatings of Cu_xPS_x on Organic Glass — B. P. Kryzhanovskii, B. M. Kruglov, and A. N. Kashtanov 725 209

High-Temperature Vacuum Furnace-Cuvette for Studying Reflection Spectra — A. A. Mal'tsev, V. S. Nikitin, S. M. Chernin, and N. A. Ereshko 728 212

Apparatus for Obtaining an Assigned Temperature Distribution on a Section of Metallic Conductor — L. K. Voronin 731 214

	Engl.	Russ.
Temperature Recorder of Class 0.05 — N. A. Glukhov, R. Ya. Rezler, and I. B. Fogel'son	733	216
Use of Helium at a Supercritical Pressure for Cooling Superconducting Systems under Spaceflight Conditions — O. P. Anashkin, B. M. Belitskii, V. B. Brodskii, L. V. Kunosova, N. M. Mikhailov, L. A. Razorenov, T. M. Sidyakina, and M. I. Fradkin	735	218
Automatic Device for Maintaining the Level of Liquefied Gases — V. V. Zyryanov and V. M. Safronov	738	221
ABSTRACTS		
Transistor Nanosecond Video Amplifier with Mutual Correction — A. D. Smul'skii	739	223
Analyzer of Magnetic-Field Harmonics of Cyclic Accelerators — V. N. Anosov, Yu. N. Denisov, N. L. D'yakov, V. L. Prilipko, Yu. L. Susov, and P. T. Shishlyannikov	740	224
Stereophotogrammetric and Illuminating Apparatus of a Meter Hydrogen Bubble Chamber — V. V. Glagolev, A. A. Gulyugin, É. V. Kozubskii, R. M. Lebedev, É. M. Livshchits, M. Maly, M. M. Rusinov, V. P. Sergeev, V. F. Sikoloeno, and V. V. Khvalovskii	742	225
Geiger Counter with a Low Sensitivity to Ultraviolet Radiation — I. A. Vasil'ev and A. A. Persinen	744	226
Highly Efficient Activation Neutron Detectors — E. K. Ryanyushkin and V. S. Sivakov	745	227
Function Generator for Identifying Charged Particles — Yu. V. Mineev and L. S. Aleksandrov	747	228
Highly Sensitive Spectrum Analyzer of Low and Infralow Frequencies — V. M. Zhestovskii and B. A. Chekannikov	749	229
Optical Correlation Analyzer of Process Recordings — V. A. Zverev, I. V. Maslov, E. F. Orlov, and K. E. Rogovtsev	750	230
Relaxometer for Measurements by the Method of Free Nuclear Induction — V. D. Neretin and É. A. Bylina	752	231
Method of Measuring the Dispersion of the Delay Times of Breakdown of Controlled Spark Gaps — I. I. Aksenov, V. K. Bocharov, V. L. Golosnyak, A. I. Zhdanov, V. I. Slatin, and S. A. Smirnov	753	232
Highly Sensitive Tests for Airtightness by Means of the PTI-6 and PTI-7 Industrial Mass-Spectrometer Leak Detectors — M. I. Men'shikov	755	233
Apparatus for Measuring the Hall-EMF and the Conductivity of Semiconductor Materials in an Alternating Electric and Magnetic Field — A. K. Abiev and N. A. Ukhin	757	234
Optical Display of the Fourier Transform of an Electrical Signal — V. A. Zverev, E. F. Orlov, and I. S. Rakov	759	235
NEW INSTRUMENTS		
UZAS-7 Ultrasound-Velocity Analyzer	761	237
TVV-2 Eddy Current Vibrometer	761	238
OMP-54 Optical Micropyrometer	762	238
FP-1"u" Ferroprobe Pole Seeker	763	239
M503M Laboratory Megohmmeter	763	239

Number 4 July-August, 1968

Experimental Methods of Acoustic Nuclear Magnetic Resonance (Review) — A. M. Sazonov and S. B. Grigor'ev	765	5
NUCLEAR EXPERIMENTAL TECHNIQUES		
Combination Resonances Caused by the Transverse Components of the High-Frequency Accelerating Field in Ring Accelerators and Storage Systems — A. V. Barkhudaryan and Yu. F. Orlov	776	17
Calculation of Electron Losses in Storage Systems Owing to Interaction with the Radiation of a Colliding Beam — A. V. Barkhudaryan and P. R. Zenkevich	780	20

Shaping Small-Phase-Length Electron Clusters in an Injection Accelerator—E. K. Ostrovskii, A. I. Zykov, G. D. Kramskoi, and V. A. Vishnyakov 782 22
Current Switching in Tesla Transformers—A. A. Egorov, V. S. Panasyuk, and S. M. Shirkin .. 786 26
Optimizing Measurements of the Synchrotron Bremsstrahlung Total Energy—V. V. Yakushin . 790 30
Apparatus for Orienting the Single-Crystal Target of an Electron Synchrotron —V. N. Kuz'min, Yu. I. Sertakov, and V. D. Epaneshnikov 793 33
Tritium Sandwich Targets for a Neutron Generator—L. N. Katsaurov, A. N. Kuznetsov, and I. V. Surkova 795 35
Single-Isotope Ti, Zr, and Hf-Targets for Nuclear Research—L. G. Lishenko, T. S. Nazarova, A. A. Rozen, and L. N. Reshetova 797 37
Anticoincidence Spectrometer with a Ge(Li) Detector—I. P. Sadokhin and A. I. Lashchuk .. 799 39
Viewing Table for Processing Photographs from Large Bubble Chambers—K. Wattenbach, V. Gresch, G. Novatsky, and R. A. Pose 801 41
Semiautomatic Apparatus for Measuring Photographs of Bubble Chambers—R. Leiste, H. Lippoldt, and R. A. Pose 805 44
A Measuring Projector for Analyzing Bubble Chamber Photographs—H. Kirst, K. Kuhn, H. Lippoldt, G. Nowacki, R. A. Pose, H. Thom, and P. Hein 808 46
Instrument for Measuring the Ionization of Charged Particles in Bubble Chambers —K. Wattenbach, H. Kaufmann, and R. A. Pose 811 49
High-Pressure Cylindrical Track Spark Chamber—A. V. Alakoz, O. P. Babushkina, V. N. Bolotov, and M. L. Devishev 813 51
Small Pulse Fission Chambers—A. B. Dmitriev, E. K. Malyshev, and I. A. Reformatskaya .. 817 55
Recording of α-Particles by Means of Nitrocellulose Film—A. V. Mitrofanova *and Yu. N. Ranyuk* 821 58
Threshold Cerenkov Counter with Recording of the Ultraviolet Part of the Spectrum —A. M. Blagorodov, V. V. Vladimirskii, G. K. Kukavadze, B. Ya. Kuznetsov, and N. V. Novikova 823 59
Filter Method for Determining the Optical Spectra of Scintillations—N. G. Volkov, G. V. Ivanov, V. R. Lyapidevskii, and I. M. Obodovskii 830 65
Technical Light Output of NaI-Based Scintillators—M. E. Globus, A. M. Ratner and Yu. A. Tsirlin 832 67
Stability Criterion for a Measuring Instrument—F. S. Zavel'skii 834 69

ELECTRONICS AND RADIO ENGINEERING

Associative Address Memory Device of a Million-Channel System—R. G. Ofengenden, G. B. Lyubanskii, P. N. Svetlichnyi, and I. D. Dychenko 838 73
Distribution of the Working Time at a Measuring Center Among the Subscribers —V. I. Smirnov and V. N. Kabenin 845 81
Output of Data from a M-20 Computer to a Remote Telegraph Apparatus—V. V. Gavrilov, L. P. Konstantinova, A. V. Kutsenko, Yu. V. Stupin, A. P. Sorokin, and V. V. Ptitsyn 850 85
Coincidence-Anticoincidence Circuit having a Short Resolving Time for Operation under Heavy Loads—V. P. Kanavets, B. V. Morozov, N. A. Nikiforov, and A. S. Starostin 854 89
High-Speed Scaling Circuit using Tunnel Diodes and Transistors—V. G. Vovchenko and V. M. Zheleznyakov 858 93
Parametric Circuit for Selecting Radio-Frequency Pulses according to Duration—V. A. Guseva .. 860 95
IVI-1 Time-Interval Meter—L. S. Zazhigaev, V. A. Matnya, N. I. Pashkov, G. I. Savinov, and V. S. Yaroslavtsev 863 98
Wide-Band Time-to-Amplitude Converter—Yu. G. Budyashov and V. G. Zinov 868 102
Gate Using a Differential Transformer—M. V. Korolev 871 105
Shaping of Nanosecond and Picosecond Video Pulses—D. Yu. Éidukas 873 107
Precision-Amplitude Pulse Generator—V. M. Suvorov and A. I. Shchetkovskii 880 112
Random Pulse Generator—V. M. Taukchi 882 114
Nanosecond Current Pulse Generator for Supplying Semiconductor Lasers—B. M. Koval'chuk ... 884 116
Generator of Sinusoidally Modulated Current Pulses for Supplying Semiconductor Lasers —S. S. Barkalov and V. N. Deryagin 888 119

Correction of the Pulse Shape of a Relaxation Generator Using a Secondary Emission Vacuum Tube—O. S. Kolotov	891	122
Controlled Delay of High-Power Nanosecond Pulses with the Use of the Magnetization Reversal Time of Ferrites—R. B. Baksht, A. S. El'chaninov, and G. A. Mesyats	893	124
Some Defects in the Charge Detector Amplifier Circuit—V. F. Lyutenko	896	126
Instrument for Measuring Small Increments of Resistance—V. I. Kostenko, P. E. Stadnik, and V. N. Zvyagintsev	900	130
Coupling Circuit of a Photoconverter of a Linear-Movement Pickup—D. A. Asfendiarov and V. V. Dobyrn	903	133
Q Measurement of Superconducting Resonators—F. F. Mende, V. M. Dmitriev, E. V. Khristenko, and G. E. Churilov	905	134
Cadmium Sulfide Thin-Film Hypersonic Transducers—A. N. Chernets, E. M. Ganapol'skii, N. L. Kenigsberg, V. E. Popov, and A. Ya. Nevelev	908	137
System for Measuring Infrared Radiation by Means of a Bolometer with Automatic Compensation for the Unbalance of the Bridge—A. V. Kartashev and M. N. Markov	913	142
Measurement of Chemical Shifts on NMR-5535 Spectrometer—L. M. Kapkan	918	146
Determination of Sign of Spin Transitions in Electron Paramagnetic Resonance—A. M. Belonogov	919	147
Wideband Current Stabilizers—S. S. Yastrebov, N. V. Lazarev, and A. M. Kozodaev	921	149
GENERAL EXPERIMENTAL TECHNIQUES		
Use of Various Types of Mass Spectrometers for Studying the Decomposition Processes of Polymers—A. V. Amelin, Yu. A. Glagoleva, O. F. Pozdnyakov, and V. R. Regel'	924	152
Pulsed Spark Sorption Pumps—L. K. Bruneller, A. P. Gorshkov, N. G. Pavlovskaya, A. M. Rodin, and V. A. Tsukerman	928	156
Low-Capacity Mercury-Vapor Diffusion Pump for Ultrahigh Vacuums—V. F. Rybalko, Ya. M. Fogel', V. I. Tatus', and V. G. Granovskii	932	159
Some Characteristics of Carbon Adsorption Pumps—V. P. Babiichuk, L. S. Dikina, B. N. Esel'son, and I. A. Serbin	934	161
Method for Determining the Vapor Pressure of Metals and Alloys from the Rate of Flow of the Vapor through a Diaphragm—N. S. Kudryavtsev and L. I. Ivanov	936	163
Pneumatic Ultrahigh-Vacuum Valves with Indium Seals—A. V. Aref'ev, V. Ya. Lisitsin, and S. P. Maksimov	938	165
Semiautomatic Instrument for Investigating Gas-Discharge Plasma in a Magnetic Field—L. A. Levshuk	943	169
Instrument for the Investigation of Secondary Electronic and Photoelectric Emission of Substances with a High Resistivity—L. Ya. Bubnov and E. L. Frankevich	945	171
Method of Measuring the Temperature of Field Emitters—S. Mruz and É. Chzanovski	950	176
Effect of Electrostatic Field on Image Formation in the Field Ion Microscope—V. T. Borisov, V. I. Kirienko, and L. P. Potapov	952	178
Simple Method of Determining the Sensitivity Curve of a Photomultiplier—E. P. Pakhomov	957	183
Instrument for Studying the Spectral and Kinetic Characteristics of Luminescence with Electron Excitation—É. D. Aluker, I. S. Tomkus, and S. A. Chernov	958	184
Generation of Light Pulses of Special Form—O. F. Butyagin, V. G. Dmitriev, V. V. Kudryavtsev, T. V. Petrova, and Yu. A. Yanait	961	186
Automatic Frequency Control of a Laser and Regenerative Amplifier—V. M. Andriyakhin, A. G. Basiev, V. V. Lebedeva, and A. I. Odintsov	963	188
Method of Obtaining Ultra-Strong Constant Magnetic Fields—V. G. Veselago, L. P. Maksimov, and A. M. Prokhorov	967	192
Measurement of Magnetic-Field Inhomogeneity to High Accuracy—G. S. Anufriev and B. A. Mamyrin	970	195
Measurement of Gas Flow Velocity by the Electrical Breakdown Method—P. G. Zykov, A. M. Filatov, and P. E. Suetin	974	199

Method for Producing Loose Films with a Thickness of ~100 nm from Volatile Substances Mg, Zn, and Te—O. M. Sorokin and T. N. Podkladenko 979 204
Methods for Determining the Thickness of Thin Films Applied to a Dissimilar Material —V. K. Voitovetskii, I. L. Korsunskii, and N. S. Tolmacheva 982 206
Device for Determining the Young's Modulus of Metals and Alloys in the Temperature Range 4.2-300°K—R. A. Ul'yanov, N. D. Tarasov, L. S. Krundarev, L. F. Mar'yanina, and V. A. Moskalenko 983 207
Capacitive Sensor for Measuring Ultralow Temperatures—V. I. Makhan'kov, I. S. Sidorenko, and G. P. Shemonaev 986 210

ABSTRACTS
Master Element of the Time Program for Controlling the Operation of Bubble Chambers —V. F. Sikolenko 989 213
Design of Samplers for the Synthesis of Transuranium Elements on the Internal Beam of Ions of the 310-Centimeter Cyclotron—I. V. Kolesov 990 214
Ion-Optical System of a Plasma Source—V. I. Raiko and B. E. Gavrilov 992 215
Wide-Range Magnetic Spectrograph—A. K. Val'ter, A. S. Deineko, I. Ya. Malakhov, A. I. Kovalenko, and A. Ya. Taranov 994 216
Method of Determining the Ranges of Fragments by Thick Absorbers—G. A. Fedoseev, L. P. Moskaleva, and B. Ya. Shcherbovskii 995 217
Measurement of the Topography of the Magnetic Field in Electromagnets for Bubble Chambers—P. P. Gordeev and S. V. Skachkov 997 218
Microdistortions in Nuclear Emulsions Caused by Adhesion of the Layers before Development—V. I. Baranov 999 219
Input Unit of a Multivariate Analyzer—V. E. Ivchenko and V. I. Smirnov 1001 220
Errors Related with the Dead Time of Counters during Fluctuations of Source Intensity —A. M. Shenderovich 1002 221
Time-to-Pulse-Height Converter with Automatic Protection of the Measuring Circuits Against Large Loads—K. N. Bakinovskii, V. A. Danilov, and A. F. Chernyavskii 1004 222
Interpolation Time-Interval Meter—G. A. Aver'yanov and E. G. Lebed'ko 1005 223
Three-Channel Metallic Sample Introduction System for a Mass Spectrometer —I. M. Adel'bert and É. R. Sats 1007 224
Apparatus for Studying the Interaction of 10-100 keV Ions with a Solid—S. Ya. Lebedev, V. E. Dubinskii, O. I. Kapusta, V. I. Krotov, N. M. Omel'yanovskaya, and S. D. Panin 1009 225
Instrument for Measuring Short Lifetimes of Hot Charge Carriers in Semiconductors —V. G. Ivanov and A. I. Morozov 1011 226

NEW INSTRUMENTS
AO-6P Transfer Function Analyzer 1013 227
PÉ10-20 Electronic Potentiostat 1014 228
ÉM-64 Electrometric Millivoltmeter 1014 228
MSKh-3A Time-of-Flight Mass Spectrometer 1015 229
TPN-1u Inductive Thickness Gauge 1015 229
VUP-1 General-Purpose Vacuum Station 1016 229
UZDN-1 Ultrasonic Disperser 1017 231
ERRATA 1018

Number 5 September-October, 1968

Fiftieth Anniversary of the State Physicotechnical Roentgenological Institute (GFTRI) —A. F. Ioffe Physicotechnical Institute of the Academy of Sciences of the USSR 1019 5
Methods of Separating Weak Periodic Signals from Noise (Review)—A. V. Potapov, V. V. Chekalov, and A. F. Chernyavskii 1020 7

NUCLEAR EXPERIMENTAL TECHNIQUES

Compensating System for Injecting Particles into the Constant Field of a Storage-System Track—E. S. Mironov, V. N. Pakin, and G. I. Sil'vestrov	1035	23
Telemetric System for Measuring the Parameters of a Proton Foreinjector—Yu. A. Bychkov, Yu. I. Romanov, and Sh. Z. Saifulin	1039	27
Recording of Electron Orbits in a Microtron by Means of Alkali Halide Compounds —A. P. Zhuk, M. L. Kats, V. K. Nikol'skii, N. N. Sorokin, and V. P. Stepanchuk	1044	31
Magnetic Separator for the Ion Source of an Electrostatic Accelerator—A. I. Kirillov and V. M. Morozov	1047	34
Transporter Charging System for an Electrostatic Accelerator—V. M. Morozov, N. A. Morozov, and A. V. Peshkov	1049	36
Calibration of Scintillation 4π-γ-Spectrometers by Means of the Total Peak Method—V. A. Vetrov	1051	37
Wide-Capture Magnetic Spectrometer Having High Resolution and High Luminosity —N. G. Afanas'ev, V. A. Gol'dshtein, V. S. Dementii, and L. D. Yaroshevskii	1055	41
Neutral-Particle Source—N. I. Alinovskii and Yu. E. Nesterikhin	1057	43
Current Meters for Noncontact Measurements of Charged-Particle Beam Intensities —G. A. Koval'skii, V. I. Aref'ev, and Yu. P. Maishev	1061	47
Power Supply for Multigap and Wide-Gap Spark Chambers—I. K. Zhankov, V. M. Kuznetsov, and O. I. Stukov	1065	50
Angular Measurements of Fission-Fragment Tracks in an Ionization Chamber—B. G. Basova, O. I. Ivanov, Yu. A. Kushnir, and A. M. Shimanskii	1068	53
System for Selecting Particle Tracks in Bubble-Chambers within Their Scanning Zones —S. P. Buyukyan and A. S. Nanasyan	1073	58
Current Ionization Fission Chamber with a "Non-Burning-Up" Radiator—E. K. Malyshev	1076	61
Silicon Detectors for Registering Pulsed Streams of γ Radiation—P. S. Kireev, I. A. Arkhangel'skii, Yu. D. Bespyatov, Yu. A. Brusov, V. I. V'yunskovskaya, B. V. Gavrilovskii, G. I. Kol'tsov, and V. I. Mitin	1079	63
End-Window Counter with Attached Anode—K. N. Shlyagin and G. I. Savel'ev	1082	65
Automatic Compensation of the γ-Background in a β-Radiometer—A. A. Petushkov	1084	67
Measurement of γ and Neutron Components in Mixed Fields by Means of Plastic Scintillators—E. E. Baroni, D. V. Viktorov, S. F. Kilin, I. M. Rozman, and V. M. Shoniya	1087	70
Parameters of Scintillators for Resolving Neutrons and γ Rays by the Pulse Shape —L. E. Grudskaya, V. F. Poduzhailo, and Yu. A. Tsirlin	1090	73
Liquid Scintillators on a Machine Oil Base—I. I. Zemskova, L. Ya. Zhil'tsova, and V. G. Tyminskii	1093	75
ELECTRONICS AND RADIO ENGINEERING		
Time-Amplitude Converter in the Microsecond Range for Investigating Asymmetry of μ-e-Decay—E. A. Meleshko	1094	77
Nuvistor Preamplifier for Work with Semiconductor Detectors—Yu. F. Rodionov and V. S. Shiryaev	1098	81
Reversible Decatron Counter—V. G. Galalu, R. V. Korobkov, and V. E. Shakhmatov	1101	84
Relation between Signals in Different Recording Systems—N. G. Volkov and V. K. Lyapidevskii	1103	86
Spectrometric Measurements on the Minsk-2 Electronic Computer—V. A. Vladimirov, F. Duda, G. I. Zabiyakin, and Z. V. Lysenko	1106	89
Two-Channel Synchronous Numeric Printer—F. S. Zavel'skii and A. L. Kerzin	1111	94
Current Pulse Generator—B. F. Bayanov, A. V. Il'in, V. N. Pakin, A. P. Panov, and G. I. Sil'vestrov	1113	96
Transistor Generator for Rectangular Nanosecond Pulses of Controlled Duration —V. P. D'yakonov	1118	101
Twenty-Channel Nanosecond Pulse Generator for Supplying Pulse Light Sources —N. K. Vishnevskii, V. I. Rykalin, and Z. Tsisek	1122	105
Nanosecond High-Voltage Pulse Generators with a Controlled Amplitude—V. G. Kalinin and Yu. L. Stankevich	1125	107

Pulse Generator Based on Dinistors—V. A. Grechishkin, N. P. Zorin, L. A. Ushakov, and Yu. D. Kharizman	1128	110
Video-Noise Generator—É. V. Brodnikovskaya and V. M. Rozhkov	1130	112
Transitron RC Oscillator with Electronic Tuning—Z. M. Kanevskii and V. A. Kitin	1132	114
Single-Sideband Amplitude Modulator in the Millimeter Band for Phaseometers with Homodyne Frequency Conversion—O. A. Zinov'ev	1133	115
Radiometer for Spectral Measurements in the 8-mm Range with a Quantum Paramagnetic Amplifier—V. I. Zagatin, G. S. Misezhnikov, V. A. Puzanov, A. E. Salomonovich, R. L. Sorochenko, and V. B. Shteinshleiger	1137	118
Sign Correlator for Low-Frequency Signals—É. S. Burunsuzyan, O. V. Leonov, and M. G. Tokhmakhyan	1141	122
Instrument for Investigating Diffraction Phenomena at Periodic Structures in the Millimeter Band—Ya. S. Komissarov, V. A. Pavlyuk, G. G. Polovnikov, A. V. Provalov, and V. P. Shestopalov	1145	125
Oversize Waveguide Interferometer—L. V. Lubyako	1150	130
Microwave Cavity Measurements of Resistivity of Semiconductor Materials —D. V. Iremashvili, N. I. Leont'ev, and G. M. Mailov	1153	132
Bipolar High-Voltage Source with Frequency Conversion—N. S. Glagoleva, A. T. Matyushin, V. T. Matyushin, R. Firkovskii, and M. N. Khachaturyan	1156	134
Electronic Device for Measuring Small Mechanical Vibrations—V. B. Braginskii and V. I. Panov	1159	136
Potentiostat for Electrochemical Polishing—A. N. Vetchinkin and M. A. Golosova	1162	139
Use of an Exploding Wire as a Current Commutator—Yu. A. Anan'ev and V. P. Kalinin	1164	140
Instrument for Measuring Parameters of Radio-Frequency Signals—Yu. A. Blyumkina, V. N. Lazakov, and I. B. Yakovkin	1167	143
Circuit for Synchronizing the Triggering of an Oscilloscope—A. G. Belyavskii	1171	146
High-Resistance Miniature Semiconductor Voltmeter—L. I. Gershtein	1173	148
Transistor Memory Cell—N. I. Mel'nikov, A. E. Reinbot, and M. Z. Chapovskii	1175	149
Device for Calibrating Magnetic Spectrometers against Standard Lines—S. V. Skachkov and R. V. Chumakova	1176	150
Apparatus for Study of Electrical Explosions—V. I. Petrosyan, É. I. Dagman, and V. N. Surganov	1178	152
Measurement of Distribution of Contact Potential Difference with the Aid of a Vibrating Microelectrode—A. A. Sadovnichii, S. S. Kil'chitskaya, and R. O. Litvinov	1182	156
Field-Emission Microscope for Measuring Field Emission from Separate Faces of Single Crystals—B. M. Palyukh and L. L. Sivers	1184	158
GENERAL EXPERIMENTAL TECHNIQUES		
Mass Spectrometric Study of Residual "Background" in a Vacuum System Employing an Oil Diffusion Pump—A. É. Rafal'son, M. G. Vinn, and G. I. Stanevich	1187	162
Titanium Sorption Pumping System for Ultrahigh Vacuum—A. A. Kuz'min, V. S. Zhil'nin, and M. I. Men'shikov	1191	166
Quick-Acting Valves for Admitting Short Gas Pulses into Vacuum Devices—G. I. Dimov	1193	168
Modulation Receiver of Weak Light Radiation Based on Discrete Photon Counting —Yu. V. Gorokhov, M. N. Devyatkov, and G. I. Ovchinnikova	1196	171
Investigation of the Photomultiplier FÉU-77 for Reception of Short Pulses at the Wavelength 700 nm—T. A. Dem'yanova, V. I. Markov, F. M. Subbotin, and E. I. Shubnikov	1199	174
Reference Signal Source Based on Electroluminescence Diodes for Scintillation Counters —M. N. Omel'yanenko, V. K. Tyupikov, and V. V. Fil'chenkov	1202	177
Circuit Scheme for Modulation of the Output Voltage of a Photomultiplier —N. I. Alinovskii and B. K. Bakhtusov	1205	179
High-Sensitivity Differential Split-Beam Spectrophotometer Developed from the Spectrophotometer SF-10—S. I. Aksenov, V. N. Verkhoturov, and B. S. Kaurov	1207	181
Nonadjustable Scanning Fabry-Perot Interferometer—V. P. Koronkevich, D. A. Solomakha, and A. K. Toropov	1211	185

KFL-2 Ionization Chamber for the Measurement of High-Intensity Fluxes of Vacuum Ultra-Violet Radiation—B. I. Khrushch, A. B. Dmitriev, and A. N. Lyulichev 1215 188
Crystal Holography—K. A. Garibashvili, V. V. Mumladze, and O. A. Chikhladze 1217 190
Absolute Output Power Measurement of CO_2 Lasers—N. V. Karlov and G. P. Kuz'min 1219 191
Magnetic-Resistance Sensors Based on Indium Arsenide Films for Measuring the Gradient of a Magnetic Field—V. A. Vlasov and S. A. Semiletov 1220 192
Miniature Magnetizing Device for Producing a Uniform Alternating Magnetic Field —V. M. Mogilevskii 1224 196
Quartz-Type Generator of a Rotating Magnetic Field with Frequency Tuning —V. M. Ponizovskii, I. A. Maleev, and S. A. Petukhov 1228 200
Ultrahigh-Pressure Gas Thermocompressor—S. S. Boksha 1231 203
X-Ray Apparatus with Three-Electrode Tube—V. G. Tsukerman, V. I. Dotsenko, V. M. Finogenov, and G. T. Merkel' 1233 205
Optical Method of Checking the Bend of Crystal Analyzers of X-Ray Spectrographs —V. P. Dzeganovskii 1237 208
Electropolishing Device for Preparing Electron Microscopy Metal Specimens —V. P. Lebedev and V. I. Khotkevich 1239 210
Statistical Method of Checking the Homogeneity of the Parameters of Semiconductor Materials—N. B. Strokan, N. I. Tisnek, and V. F. Afanas'ev 1241 211
Ohmic Contacts to Gallium Phosphide—R. S. Ignatkina, R. N. Krivosheeva, S. S. Meskin, V. N. Ravich, and N. F. Sil'vestrova 1245 215
New Reference Material for Thermal-Conductivity Measurements—E. V. Shadrichev and I. A. Smirnov 1249 218
Manufacture of Large-Area Free Thin Nickel Film—S. A. Karamyan and Yu. É. Penionzhkevich 1250 219

ABSTRACTS

Efficiency of Trapping Secondary Charged Particles in Accelerating Tubes with Oblique Fields—A. N. Serbinov and A. V. Mazhulin 1252 221
High-Current 2.5-MeV Accelerator—E. A. Abramyan, V. A. Gaponov, G. S. Krainov, V. S. Nikolaev, and I. M. Shalashov 1253 222
Excitation of a Magnetic Field in a Synchrotron with External One-Revolution Injection —M. Yu. Gel'tsel' and V. S. Panasyuk 1255 223
Instrument for Analyzing the Mass and Energy of a High-Current Ion Beam—Yu. G. Gendel' and V. A. Zenin 1257 224
Determining the Intensity and Energy of Multiply Reflected β-Particles from the Attenuation Curve—L. M. Boyarshinov 1259 225
Measuring the Angular Distributions of Fission Fragments by the Glass Method —A. S. Soldatov, I. E. Bocharova, and G. N. Smirenkin 1261 226
Vacuum Evaporation of UO_2, NpO_2, AmO_2, and Cm_2O_3 for the Manufacture of Thin Films for Nuclear Research—V. M. Surin, A. N. Maslov, V. S. Sokolov, and G. A. Danilov ... 1263 227
Multichannel System for Measuring the Yield of (γ, p) Reactions—B. S. Ishkhanov, I. M. Kapitonov, I. M. Piskarev, O. P. Shevchenko, and V. G. Shevchenko 1265 228
Electron Gun with a Plasma Cathode—P. P. Golik, V. A. Gruzdev, Yu. E. Kreindel', and L. A. Levshuk 1267 229
Titanium Vaporizers Used on the Ogra in the Nitrogen Pumping System—V. I. Butusov, E. A. Maslennikov, M. Ya. Milyagin, I. A. Chukhin, and T. A. Shevchenko 1269 230
Ionization Manometer for the Measurement of Ultrahigh Vacuums in Systems with Strongly Varying Magnetic Fields—V. F. Zubarev and E. A. Penchko 1270 231
Calibration Characteristics of a Cold-Cathode Magnetron Vacuum Gage—G. A. Nichiporovich and I. F. Khanina 1271 232
Network for Stabilizing the Amplitude of the Output Pulses of a Photoelectron Multiplier in a Scanning Measuring Projector—A. N. Alekseev, V. P. Mikheev, and B. S. Rozov ... 1272 233

Magnetic Scales for Measuring Susceptibility According to the Faraday Method in the Temperature Range from Room Temperature to Helium Temperature
—*R. B. Lyubovskii and I. F. Shchegolev* 1273 234
Stabilized Magnet Power Supply—I. F. Kalinkevich 1275 235

NEW INSTRUMENTS

RSM-500 X-Ray Spectrometer-Monochromator—V. A. Zelentsov 1276 236
ÉM-5-DU Remote-Controlled Electronic Microbalance—V. A. Zelentsov 1276 237
ÉD-65 Dynamic Capacitor Electrometer—V. A. Zelentsov 1277 237
UZDN-1 Ultrasonic Low-Frequency Disperser—V. A. Zelentsov 1277 238
MII-10 Immersion-Replica Microinterferometer—V. A. Zelentsov 1278 238

Number 6 November-December, 1968

Digital Method of Filtering Periodic Signals (Survey)—A. V. Potapov, A. F. Chernyavskii, and V. V. Chekalov 1279 5

NUCLEAR EXPERIMENTAL TECHNOLOGY

An Axially Symmetrical Beam of Particles in a Static Field—*V. A. Teplyakov* 1286 13
Distribution of Particles over the Frequencies of Betatron Oscillations in Ring Accelerators
—*Yu. G. Globenko and D. G. Koshkarev* 1292 17
Measurement of the Frequency of Betatron Oscillations by the Method of Resonance Excitation
—*V. A. Uvarov and G. F. Senatorov* 1297 20
Electrostatic Accelerator with Charge Exchange—A. V. Almazov, B. V. Mironov, *F. F. Myntsov, G. Ya. Roshal', and Yu. A. Serov* 1301 23
Automatic Frequency Control of the Tuned System of a Cyclotron—N. V. Pirogov, *Yu. P. Kharitonenko, and A. I. Komov* 1308 30
Single-Turn Pulsed Quadrupole Lens—T. A. Vsevolozhskaya, L. L. Danilov, G. I. Sil'vestrov, *and N. F. Sokolova* 1311 32
Intensity of a Beam of Electrons That Have Undergone Multiple Reflections—L. M. Boyarshinov 1314 35
Source of Polarized Negative Hydrogen Ions—Yu. M. Khirnyi and L. N. Kochemasova 1316 37
New Method for Determining Parameters of a Total Absorption Peak—A. K. Gribkov *and L. D. Soshin* 1320 41
Aberrations of a Uniform-Field Double-Focusing Magnetic Spectrometer in the Case of Particles Emitted from a Source of Finite Dimensions—N. G. Afanas'ev *and V. A. Gol'dshtein* 1324 44
Nanosecond Time-of-Flight Spectrometer—V. G. Lapshin, V. I. Petrukhin, V. I. Rykalin, *D. M. Khazins, and Z. Tsisek* 1329 48
Summing Compton Spectrometer Employed in Study of Intrinsic Resolution of NaI(Tl) Single Crystals—E. P. Mokhir, Yu. A. Tsirlin, *and Yu. P. Antuf'ev* 1334 53
Uniform-Acceleration Mossbauer Spectrometer—A. M. Voronin, D. K. Kaipov, *and D. A. Shalabaev* 1337 56
Shower Particle Recording Efficiency in a Parallel-Plate Spark Chamber —*A. G. Gapotchenko, B. B. Govorkov, S. P. Denisov, and S. S. Starostin* 1340 58
Assembly and Mechanical Processing of Nuclear Emulsion Blocks—V. I. Baranov *and I. S. Mar'in* 1343 61
Prevention of Coagulation of Finely Dispersed Powder Grains Introduced into Nuclear Emulsion—*N. M. Kulikova, N. V. Nikitina, T. A. Romanova, and V. M. Uvarova* 1344 62
Recording of Charged Particles with Cellulose Nitrate—Kh. Abdullaev, V. P. Perelygin, *S. P. Tret'yakova, and N. Kh. Shadieva* 1346 64
Scintillation Dosemeter for X- and γ-Rays—M. I. Artaev, B. F. Osipov, N. E. Sulimova, *and V. A. Krasnikov* 1348 66

Apparatus to Determine Small Tritium Concentrations—V. M. Bystritskii, B. N. Mekhedov, and V. N. Mekhedov 1352 70

ELECTRONICS AND RADIO ENGINEERING

Correction of Random Distortions in Operative Communication Systems—V. I. Vinogradov. 1354 73

Multichannel Counting System—I. A. Zlobin and E. E. Shaparenko 1360 78

Multichannel Counting System Based on the AI-256 Instrument for Measuring the Outputs of Photonuclear Reactions—E. V. Armenskii and N. N. Balamatov 1363 81

Circuit for Time Analysis of Pulses in Mass Spectrometer Measurements—U. Mamyrov and P. I. Chalov 1366 83

High-Speed Point Recorder—D. V. Zevyakin, A. A. Kurashov, V. V. Paramonov, V. G. Son, and N. N. Khaldin 1369 87

Operation of Cerenkov Detector Together with Spark Chamber—A. M. Abdullaev, V. M. Gorbovskii, and T. S. Yuldashbaev 1373 90

Fast Preamplifier with Separation of Signal for Semiconducting Detectors—É. V. Lan'ko and G. S. Dombrovskaya 1376 93

Cell of Synchronous Storage Device with High-Speed Electronic Switch—A. I. Grechikhin 1378 94

High-Speed Tracking Time Selector—M. V. Korolev 1380 95

Electrometric Network with Compensation of the Input Capacitance—T. A. Adzhimolaev and O. B. Dem'yanovskii 1382 97

Stabilized Diode Noise Generator with Continuous and Modulated Regimes —V. N. Brezgunov and V. A. Udal'tsov 1385 100

Instrument for Recording Single Processes on Thin Magnetic Film—B. A. Predein, V. V. Elanskii, V. P. Zyuzin, A. P. Nagibin, S. V. Snopkova, and A. Ya. Tkach ... 1390 104

Investigation of Transient Responses of Pulse Diodes—Yu. B. Bushnin, A. F. Dunaitsev, and V. A. Sen'ko 1395 110

Monovibrator with Output Pulse Stretching—K. Korbel' 1399 113

Oscillograph Tube with Fiberglass Faceplate for Recording Single Electrical Signals of Nanosecond Duration—P. A. Tarasov and V. I. Zhavoronkov 1400 114

Automatic Compensation to Improve Precision in Oscillographic Recording—V. I. Bayunov, M. I. Demidov, and I. V. Podmoshenskii 1402 116

Discharge Current Measurement by Rogowski Loops—I. Z. Okun' 1406 120

Apparatus for Measuring Resonator Q-Factors in the Microwave Region—A. S. Petrov and G. I. Tyul'kov 1414 126

Ponderomotive Wattmeter for Measuring High-Level UHF Power—V. D. Kukush and V. S. Zhilkov 1417 129

Coherent Spin-Echo Nuclear Magnetic Resonance Relaxometer—A. N. Gil'manov and I. B. Khaibullin 1420 132

Wide-Band Generator-Detector for EPR and NMR Magnetometers—M. M. Tel'minov, G. I. Erpilev, and A. S. Sobolev 1427 137

Semiconductor Current Regulator for Supplying an Electromagnet—O. Ya. Shimkin, Yu. P. Petrov, and V. F. Ryabov 1429 140

Current Regulator of a Mass-Spectrometer Electromagnet—Yu. V. Bezmaternykh and B. B. Leporskii 1433 143

Pickup for Magnetic-Field Stabilizer—E. M. Grishchenko 1435 146

Transistorized High-Voltage Supply—P. E. Molotov, M. P. Men'shikh, and V. A. Mednikov 1437 147

Adjustable Low-Power High-Voltage Supply—L. G. Gol'denberg, A. A. Denisov, and V. S. Nagornyi 1439 150

Current Regulation in a Circuit with VK-200 Rectifier Diodes—L. S. Atroshchenko 1440 151

GENERAL EXPERIMENTAL TECHNIQUES

Ionization Vacuum Gauge for Use in the Range 10^{-10}-10^{-1} Torr—A. M. Grigor'ev and É. G. Orlov 1442 152

Oil-Free Pumping of Vacuum Systems with Diaphragm Pumps—N. N. Bagrov, V. A. Godovannyi, Yu. K. Kostin, E. L. Kravchenko, and A. E. Yanov	1446	156
The Autron—A Controlled Plasma-Cathode Gas-Discharge Device—L. N. Vagin and L. G. Ivleva	1448	157
Spark Discharger for Precise Switching of High-Power Capacitor Banks—B. M. Kovalchuk, G. A. Mesyats, and Yu. F. Potalitsyn	1452	161
Wide-Range Radiation Flux Measurement with Photomultipliers—S. I. Babichenko, V. A. Skiyankin, and R. M. Pustavait	1455	164
An Investigation of Photomultipliers Operating in a Single-Electron Mode—I. V. Reznikov and S. S. Shushkevich	1458	167
Measurement of the Time Characteristics of Photomultipliers by Means of Photons —V. V. Artem'ev	1462	171
Long-Life Geiger Counters for the Ranges 8-14 and 44-60 A—L. S. Sorokin, A. B. Dmitriev, V. G. Chaikovskii, and I. P. Tindo	1465	174
Estimating the Brightness of the Light Spot on an Electron-Beam (Cathode-Ray) Tube —T. M. Duzhii, M. I. Popov, B. M. Rabin, and V. N. Shkundenkov	1468	177
Positive Holograms in Grainless Materials—Sh. D. Kakichashvili and D. V. Leselidze	1470	179
Apparatus to Measure Nonuniform Magnetic Fields in Microvolumes—G. S. Krinchik, M. V. Cherkin, D. I. Dudko, P. M. Mikhalets, V. P. Zolotarev, A. P. Khrebtov, and Z. P. Petrash	1473	182
Device for Thermal Compression of Liquids—S. S. Boksha	1476	186
Use of Electron-Optical Converters for Recording X-Ray Diffraction Pictures —V. A. Bryzgunov	1478	188
Electron Gun for Floating-Zone Evaporation of Germanium—L. N. Nemirovskii	1482	192
Pyrex Jet Device for Preparing Thin Corundum Specimens for Examination by Electron Microscope—N. V. Glikl and A. G. Gasparyants	1484	193
Application of Films by the Evaporation of Silicon Monoxide in Vacuum—Yu. A. Golikov and R. S. Nakhmanson	1487	196
Deposition of Thin Films of Magnesium and Cadmium by Evaporation in Hydrogen and Helium—L. I. Nikolaichuk and L. I. Pivovar	1489	197
Apparatus for Growing and Processing Very Hygroscopic Crystals—A. B. Lyskovich, Z. L. Shevkis, G. M. Pentsak, and S. K. Zherebetskii	1491	198
Cryostat for Investigation of Dielectric and Acoustic Relaxation in the +50 to −15°C Temperature Range—V. D. Paponov and N. V. Chekalin	1494	201
Attachment to ESR Spectrometer for Use at 10-90°K—R. A. Asaturyan, I. V. Chernyak, N. S. Nekhoroshev, A. P. Kuzyaev, and V. I. Muromtsev	1496	203
Device for Opening Capsules in Vacuum—V. Ya. Katchan	1498	204
Formation of Beam of Charged Particles in High-Voltage Accelerator Tube—V. P. Yakushev and A. N. Serbinov	1499	205
Accelerator Tube Manufacturing Technology—A. V. Mazhulin, I. S. Belomyttsev, and A. N. Serbinov	1501	206
Stabilization System for Scintillation Gamma Spectrometer—S. P. Sit'ko, V. F. Trotsai, and V. A. Shevchenko	1502	207
Conditions Determining the Maximum Luminosity of a Neutron Spectrometer —A. Z. Men'shikov, Yu. A. Dorofeev, V. G. Arkhipov, and S. K. Sidorov	1503	208
Automatic Mössbauer Spectrometer—V. A. Lagunov and V. I. Polozenko	1505	209
Geometric Reconstruction Program for Large Bubble Chambers of Variants "1-6" —N. F. Markova, V. I. Moroz, V. I. Nikitina, A. P. Stel'makh, and G. N. Tentyukova	1507	210
Identification of Reaction Channels in Propane Bubble Chamber—T. R. Atayan, Zh. K. Karamyan, A. A. Kuznetsov, N. N. Mel'nikova, and B. Chadraa	1509	211
Sweep Unit of a Television Measurement System for Processing Data from Spark Chambers —V. A. Kantserov, V. P. Korel'nikov, and A. I. Kravtsov	1510	212

MKh 1203 Cycloidal Type Mass Spectrometer—V. A. Pavlenko, V. L. Tal'roze, A. É. Rafal'son, A. F. Ruz'min, A. A. Gol'din, Yu. A. Isakov, and B. S. Krivtsov .. 1511 213
Nanosecond Circuit of Control with Electron-Optical Converters—V. V. Korobkin and M. Ya. Shchelev 1513 214
Operation of Photomultipliers under Pulse Conditions—G. N. Markov, A. I. Krivenko, and S. V. Samylov 1515 215
Device for Measurement and Stabilization of a Magnetic Field by the Nutation Method —A. I. Zhernovoi 1517 216
Automated Coordinate System for Magnetic Measurements—N. K. Abrosimov, V. A. Fliseev, G. A. Ryabov, and I. I. Tkach 1517 217
Dilatometer with a Sensitivity of 10^{-4} Å—V. M. Pudalov and M. S. Khaikin 1520 218
Cryogenic A C Electric Motors—I. D. Kolodeev 1522 219

NEW INSTRUMENTS
AI-2048-1 Pulse Amplitude-Time Analyzer—V. A. Zelentsov 1524 220
Unary D. C. Bridge Type MO-61—V. A. Zelentsov 1526 222
